

BOOK 5

Dedicated to the Organs of Nutrition by Food and Drink and, because of Their Connection and Proximity, to the Instruments Serving Generation, Showing at the Beginning, Together and in Order, All the Figures Belonging Thereto, to Avoid the Necessity of Placing the Same Figures at the Beginning of the Several Chapters

CHAPTER 1

980 **MAN IS NECESSARILY LIABLE TO CORRUPTION, OR MORTAL; TO LIVE LONGER AND BE INCREASED, HE REQUIRES CONTRIVANCES IN MANY PLACES THAT SERVE NUTRITION AND WHICH ARE SPECIFICALLY CONSTRUCTED AS CONTRIVANCES FOR NUTRITION HAVING TO DO WITH FOOD AND DRINK** 384 [484] 589

980 The Principles of Our Generation 384 [484] -

981 Innate Necessity of Human Decay 384 [484] -

981 Necessity of Nutrition 384 [484] -

981 Necessity of Three Instruments Serving Nutrition 384 [484] 589

981 What Will Be Explained in the Present Book; a Brief Summary of the Parts Assisting Nutrition from Food and Drink 385 [485] 590

CHAPTER 2

983 **ON THE PERITONEUM** 385 [485] 591

983 Names of the Peritoneum 385 [485] 591

983 The Peritoneum Is among the Uniform Parts 386 [486] 591

984 Size and Location of the Peritoneum 386 [486] 591

984 Origin of Its Connection 386 [486] 591

984 Shape 386 [486] 591

984 The Nature of Its Surface 386 [486] 591

984 Processes Growing from the Peritoneum 386 [486] 592

985 The Peritoneum Is Not Everywhere Equally Thick 386 [486] 592

985 In What Places the Peritoneum Is Pierced 386 [486] 592

985 Vessels and Nerves with Which the Peritoneum Is Filled 386 [486] 592

986 Functions of the Peritoneum 387 [487] -

CHAPTER 3

987	ON THE ESOPHAGUS AND STOMACH	387 [487]	593
987	The Stomach Is Located below the Thorax	387 [487]	593
987	Names for the Passage Carrying Food and Drink to the Stomach	388 [488]	593
988	Beginning	388 [488]	594
988	Substance, Form, and Tunics	388 [488]	594
988	Path of Entry	388 [488]	594
988	The Esophagus Does Not Use the Same Foramen in the Septum as the Great Artery	388 [488]	594
989	Glandules Are Attached in Great Numbers to the Esophagus	389 [489]	595
990	Investigation of the Stomach	389 [489]	595
990	Location of the Stomach	389 [489]	595
990	Form of the Stomach	390 [490]	596
991	Two Orifices of the Stomach	390 [490]	596
991	Unequal Size of the Orifices	390 [490]	597
992	Glandular Flesh Standing Not Far from the Lower Orifice	391 [491]	597
992	Protuberant Substance in the Orifices of the Stomach	391 [491]	598
993	Surface of the Stomach	391 [491]	598
993	Size of the Stomach	391 [491]	598
993	Tunics from Which the Substance of the Stomach Is Formed	391 [491]	598
994	The Outer Tunic of the Stomach Is Not Very Fleshy at the Base	492	599
994	Veins and Arteries Going to the Stomach	492	599
995	Function of the Veins of the Stomach	493	600
996	Function of the Arteries	493	600
996	Passages of the Gall Bladder into the Stomach	493	601
996	Nerves of the Stomach	493	601
996	Function of the Nerves of the Stomach	493	601
997	Function of the Stomach as a Whole	493	601
997	How the Parts of the Stomach That Lie next to It Perform Its Function, and Its Resulting Contact with Other Parts	494	602
998	No Part of the Omentum Covers the Front of the Stomach	494	602

2014

1543

1555

CHAPTER 4

999	ON THE OMENTUM	494	602
999	The Account of the Omentum Should Be Placed Here	494	602
999	Site of the Omentum	494	–
1000	Shape of the Omentum	495	603
1000	Brief Account of the Substance of the Omentum	495	604
1001	Origin and Subsequent Attachment of the Omentum	495	604
1002	Connection of the Omentum with the Colon	496	605
1002	Veins Entwined in the Omentum	496	605
1003	Arteries of the Omentum	497	606
1003	Nerves of the Omentum	497	606
1003	Fat	497	606
1003	Glandular Body of the Omentum	497	606
1004	Function of the Omentum	497	606
1004	The Fabric of the Omentum Corresponds to Its Uses	497	606
1005	APPENDIX: On the Position of the Omentum (Revised Version)	–	602

CHAPTER 5

1006	ON THE INTESTINES	497	607
1006	What Is Included Here in the Name “Intestines”	498	607
1006	The Intestines Are a Continuous Body, but for Different Reasons Have a Number of Parts and Various Names	498	607
1007	A Brief Summary of the Intestines	498	607
1007	Beginning of the Intestines from the Stomach, and the Course or Position of the Thin Intestine	498	607
1007	Division of the Small Intestine into Three; First Part	498	608
1008	Second Part	499	608
1008	Third Part	499	608
1008	Where the End of the Jejunum and the Beginning of the Ileum Needed to Be Situated	499	–
1008	Form of the Small Intestine	499	609
1008	Substance	499	609
1009	What Anatomists Call the Concave Part of the Intestines	499	609
1009	Veins and Arteries of the Small Intestines	499	609
1009	Nerves	499	609
1009	Glands of the Intestines	499	610
1010	Summary of the Large Intestines	500	610
1010	Nature of the Cecum	500	610
1011	Course and Location of the Large Intestine	500	611
1011	The Large Intestine Is Divided into Colon and Rectum	501	611

2014		1543	1555
1012	Difference between the Colon and the Rectum	501	611
1012	Tunics of the Large Intestines	501	611
1012	Veins and Arteries of the Colon and Rectum	501	612
1013	Nerves	501	612
1013	Fat Attached to the Intestines	501	612
1013	Muscles of the Rectum	501	612
1013	Function of the Intestines, and the Reason for Their Construction	501	612
1014	Reason for the Position of the Intestines	502	613
1015	Reason for the Form of the Intestines	503	614
1015	Reason for Their Substance; the Tunics	503	614
1015	Fibers	503	614
1015	Veins and Arteries	503	614
1015	Nerves	503	615
1016	Reason for the Insertion of the Bile Duct	503	615
1016	Why the Jejunum Transmits Decoction Faster	503	615

CHAPTER 6

1017	ON THE MESENTERY	504	615
1017	Nomenclature of the Mesentery	504	615
1017	Its Location	504	615
1017	Substance	504	615
1017	Shape and Origin	504	615
1018	Rationale and Use of the Mesenteric Substance	504	616
1019	Mesenteric Fat	505	617
1019	Glands	505	617
1020	APPENDIX: Addition on the Veins of the Mesentery	-	616

CHAPTER 7

1021	ON THE LIVER	505	618
1021	Position of the Liver	505	618
1021	Reason for Its Location	505	618
1021	The Liver Is to a Great Extent Surrounded and Protected by Ribs	505	618
1022	Shape of the Liver	505	618
1022	The Liver Required No Special Shape	506	619
1022	The Form of the Human Liver Differs from That of Dogs and Pigs	506	619
1023	Substance of the Liver	507	620
1024	Vein Systems	507	620
1024	Passages of the Gall Bladder in the Liver	507	621
1024	Arteries	507	-
1024	Substance Covering the Vessels	507	621
1024	Ligaments of the Liver and the Tunic Originating Therefrom	507	621
1025	Nerves	507	621

2014		1543	1555
1025	Function of the Liver and the Reason for Its Structure	508	621
1025	How Sanguification by the Liver Is Performed	508	622
1026	The Primary Organ of Sanguification	508	-
1026	Reason for the Series of Veins	508	622
1026	Reason for the Location of the Bile Passages	508	622
1026	Location of the Artery	508	622
1026	Nerves	508	622
1026	Tunics	508	622

CHAPTER 8

1027	ON THE BLADDER FOR YELLOW BILE	509	623
1027	Location of the Gall Bladder	509	623
1027	Form	509	623
1027	Substance	509	623
1027	Veins, Arteries, and Nerves	509	623
1028	Passages for Receiving and Expelling Bile	509	623
1028	Whether the Inserted Duct of the Gall Bladder Presents a Branch to the Stomach	509	624
1029	A Passage Does Not Always Extend from the Gall Bladder into the Stomach	510	624
1029	The Best Place for Purging Bile	510	624
1029	Usefulness of the Flow of Bile into the Intestines	510	625

CHAPTER 9

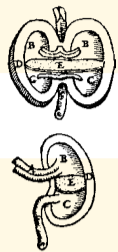

1031	ON THE SPLEEN	511	626
1031	Location of the Spleen	511	626
1031	Shape	511	626
1032	Surface and Color of the Spleen	511	626
1032	It Is Not Useless to Cook Human Organs to Learn Their Structure	512	627
1032	Vessels in the Body of the Spleen	512	627
1032	Substance of the Spleen	512	627
1033	Source of the Spleen's Veins, Arteries, and Nerves	512	628
1033	Tunic of the Spleen	512	628
1033	Its Attachment	512	628
1033	Use and Function of the Spleen	511 [513]	629
1034	What the Spleen Ejects into the Stomach, and by What Passage	511 [513]	629
1036	APPENDIX: Digression on Splenic Pathology	-	627

2014

1543

1555

CHAPTER 10

1037	ON THE KIDNEYS	514	630
1037	Number and Place of the Kidneys	514	630
1038	Shape of the Kidneys	515	631
1038	Size	515	631
1038	Substance	515	631
1038	Veins and Arteries Presented to the Kidneys	515	632
1038	Internal Structure of the Kidneys	515	632
1041	Function of the Kidneys	516	634
1041	Tunics of the Kidneys	517	634
1041	Renal Nerves	517	634

CHAPTER 11

1042	ON THE BLADDER RECEIVING URINE AND THE PASSAGES DELIVERING URINE FROM THE KIDNEYS INTO THE BLADDER	517	635
1042	Location of the Bladder	517	635
1042	Shape of the Bladder	517	635
1043	Substance of the Bladder	518	635
1043	Veins, Arteries, and Nerves of the Bladder	518	636
1044	Passage Removing Urine from the Fetus, and Special Arteries of the Fetus Connected to the Bladder	518	–
1044	Account of the Passages Delivering Urine from the Kidneys into the Bladder	518	636
1045	Skilful Insertion of the Urinary Passages	519	637
1045	Neck of the Bladder	519	637
1046	How Many Organs of Nutrition Have So Far Been Mentioned	519	–
1046	APPENDIX: Revised Version of the Section on the Passage Removing Urine from the Fetus, and Special Arteries of the Fetus Connected to the Bladder	–	636

2014

1543

1555

CHAPTER 12

1047	NATURE PROVIDED FOR THE PROPAGATION OF THE SPECIES	519	638
1047	Brief Enumeration of the Parts That Serve Generation	520	638
1047	The Appetite for Use Added to the Organs of Generation	520	639

CHAPTER 13

1049	ON THE ORGANS OF MEN SERVING GENERATION	520	639
1049	Questions and Controversies That Appear in Describing the Organs of Generation	520	–
1050	Location and Number of the Testicles	521	639
1050	Shape of the Testicles	521	639
1050	Substance	521	639
1050	Wrappings Common to Each of the Testicles	521	639
1051	Individual Wrappings of Each Testicle	521	640
1051	Testicular Muscle Attached to Its Outer Wrapping	522	640
1052	Innermost Wrapping of the Testicle	522	–
1053	The Number and Origin of Vessels Carrying Blood and Spirit to the Testicles	522	641
1053	Their Route to the Testicle	523	642 [644]
1054	Mingling and Plexus of the Vein with the Artery	523	642 [644]
1055	Insertion of the Plexus of Vein and Artery into the Substance of the Testicle and Its Closest Wrapping	524	643 [645]
1055	Account of the Vessel Carrying Semen from the Testicle to the Neck of the Bladder	524	643 [645]
1057	Glandular Body Receiving the Insertion of the Vessels Carrying Semen	525	645 [643]
1057	Construction of the Parts Described in This Chapter	525	645 [643]
1058	Origin of the Vessels Delivering Material to the Testicle	525	645 [643]
1058	Structure of the Vas Deferens	526	646
1059	Function of the Glandular Body Attached to the Neck of the Bladder	526	647
1059	Galen's Anatomical Demonstration Proving That the Glandular Body Is Not Responsible for Preparing Semen	526	647

2014

1543

1555

CHAPTER 14

1061	ON THE MALE MEMBER OR PENIS	527	648
1061	Structure of the Penis	527	648
1061	The Principal Substance of the Penis	527	648
1061	Galen Never Looked at the Fabric of the Human Penis	527	648
1062	Location of the Penis	528	648
1062	Parts Involved in the Construction of the Penis: Its Two Principal Bodies	528	648
1062	Passage Common to Urine and Semen	528	649
1063	Glans	528	649
1063	Veins, Arteries, and Nerves	528	649
1063	Skin	528	650

CHAPTER 15

1065	ON THE UTERUS AND OTHER FEMALE ORGANS SERVING REPRODUCTION	529	651
1065	The Uterus Is Divided into the Fundus and the Neck	529	651
1065	Site of the Uterus and Its Contacts with Neighboring Parts	529	651
1066	Shape of the Uterus	530	652
1067	The Surface of the Uterus	530	652
1067	Inner Cavity of the Fundus of the Uterus	530	653
1069	Inner Surface of the Vagina	531	653
1070	Orifice of the Fundus of the Uterus	532	–
1070	Horns of the Uterus	532	–
1071	Galen Never Inspected a Human Uterus	532	–
1071	Size of the Human Uterus	533	655
1072	Substance of the Fundus of the Uterus	533	656
1073	Tunics of the Uterus	533	656
1074	Fibers of the Inner Tunic of the Uterus	534	656
1074	The Pregnant Uterus	534	–
1074	Substance of the Vagina	535	657
1075	The Testicles of Women	535	657
1075	Wrappings of the Testicles	535	–
1076	Seminal Vessels in Women	535	–
1076	Veins and Arteries of the Uterus	536	659
1077	Parts to Which the Uterus Is Attached, and Those That It Only Touches	536	660
1077	Muscles of the Uterus	536	–
1078	Slightly Prominent Caruncles at the Opening of the Vagina	536	–
1078	Function of the Uterus and Reason for Its Configuration	537	660

2014

1543

1555

1078	Reason for Its Location	537	660
1078	Reason for Its Form	537	661
1078	Size	537	661
1078	Substance	537	661
1079	Reason for Its Surface and Connections	537	661
1079	Reason for the Orifice of the Fundus	537	661
1079	Reason for the Vagina	537	661
1079	Reason for the Seminal Vessels and the Testicles	537	662
1079	Reason for the Nerves and Veins	538	662
1080	The Source of Menstrual Purgations	538	662
1082	APPENDIX A: Revised Version of the Remainder of the Section on the Position of the Uterus	–	651
1083	APPENDIX B: Rearranged and Revised Account of the Features near the End of the Vagina	–	653
1083	Its Pit and the Insertion of the Neck of the Bladder Therein	–	653
1083	The Hymen	–	654
1084	APPENDIX C: Revisions on the Ovaries, Their Covering, and the Seminal Vessels	–	658
1084	Sinuses of the Testicles, and the Humor Contained in Them	–	658
1085	Wrappings of the Testicles	–	658
1085	Nature of the Female Seminal Vessels	–	659
1086	APPENDIX D: On the Veins of the Uterus; Comparative Anatomy of the Uterus	–	663
1087	Galen Never Dissected or Described a Woman's Uterus	–	664
1087	Account of the Bovine and Caprine Uterus	–	664
1088	Description of the Canine and Porcine Uterus	–	666
1089	How It Is Known That Galen Did Not Dissect a Human Uterus	–	666
1089	By the Position of the Uterus	–	666
1089	By the Cavity of the Uterus	–	666
1090	By the Number of Uterine Tunics, and the Formation of the Whole Uterus	–	667
1090	In His Description of Certain Parts of the Body Galen Is Quite Ambiguous and Does Not Trust Himself	–	667
1090	In His Explanation of the Shape, Muscles, and Horns of the Uterus	–	667
1090	In His Explanation of the Acetabula, Veins, and Arteries	–	667
1091	In His Explanation of Vessels That Deliver Semen	–	668

CHAPTER

16

1092	ON THE ACETABULA OF THE UTERUS	539	669
1092	What the Acetabula of the Uterus in Fact Are, and What Parts Were First So Called	539	669
1092	What Parts Were Secondly Called Acetabula by the Ancients	539	669
1093	To What Parts the Name Acetabulum Was Thirdly Applied	539	670
1094	APPENDIX: Revised Part of the Section on the Acetabula or Cotyledons of the Uterus	-	670

CHAPTER

17

1095	ON THE WRAPPINGS COVERING THE FETUS IN THE UTERUS	540	671
1095	Controversies That Generally Arise in the Tractate <i>De foetuum formatione</i>	540	-
1096	First and Outermost Wrapping of the Fetus	541	-
1097	Second or Middle Wrapping of the Fetus	542	-
1098	Third Wrapping of the Fetus	542	-
1100	APPENDIX: Revised Version of Chapter 17	-	671
1100	What Is the Secundine or <i>χωρίον</i>	-	671
1100	The Fetus Is Surrounded by Two Wrappings; What Is the Use of the Attachment of the Outer Wrapping to the Uterus, etc.	-	671
1102	The Need for a Fleishy Substance Attached to the Outer Wrapping of the Fetus	-	672
1102	How the Outer Wrapping Got Its Name from a Type of Sausage	-	673
1103	Inner Wrapping of the Fetus	-	673
1103	Passage Carrying Fetal Urine between the Two Wrappings	-	674
1103	The Special Receptacle of Urine between Two Wrappings of the Fetus	-	674
1104	Where Fetal Sweat and Other Wastes Are Accumulated	-	674
1104	How Urine, Sweat, and Wrappings Make Their Exit at Birth	-	675
1105	How the Fetal Wrappings Are Arranged when Several Fetuses Are Present at the Same Time	-	675
1105	The Truth about the Fetal Wrappings Is Far from the Opinions of Galen	-	676

CHAPTER

18

1106	ON THE BREASTS	543	676
1106	Location of the Breasts	543	676
1106	Shape	543	676
1106	Substance	543	676
1107	Substance of the Nipple	544	677
1107	Series of Veins Going to the Breast	544	677
1108	Source of the Mammillary Nerves	545	678
1108	Function and Office of the Breasts, and Their System of Construction	545	678
1109	Reason for Their Location	545	678
1110	Reason for the Shape	546	679
1110	Reason for the Construction of the Nipple and Its Overall Substance	546	679
1111	Reason for the Communion of the Uterus with the Breasts	546	-
1112	APPENDIX A: Additional Veins to the Breast	-	677
1113	APPENDIX B: Revised Chapter Ending	-	680
1113	System of Vein Distribution, and Partnership of the Uterus with the Breasts	-	680

CHAPTER

19

1114	HOW IT IS BEST TO PERFORM AN ANATOMY, AND HOW TO DISSECT EACH OF THE PARTS THAT ARE MENTIONED IN THIS BOOK	547	680
1114	Order to Be Observed in Teaching Anatomy	547	-
1115	What Kind of Body Is Suited for Use in a Dissection	548	-
1115	When All the Parts Must Be Shown in a Single Body, Which Parts Should Provide the Starting Point	548	-
1116	Dissection of the Skin, Epidermis, Fat, and Fleishy Membrane in the Abdomen	548	682
1117	Veins Running out through the Region of the Abdomen between the Skin and the Fleishy Membrane	549	683
1117	Dissection of the Eight Muscles of the Abdomen	549	683
1117	Dissection of the Veins, Arteries, and Nerves That Pass through the Abdominal Muscles	549	683
1118	Removal of the Peritoneum from Parts Externally Attached to It	549	683
1118	Opening of the Peritoneum and Dissection of the Umbilical Vessels	549	684
1119	Severance of the Umbilical Vessels	550	684
1119	Observation of the Site of the Omentum	550	684
1119	Examination of the Site of the Intestines	550	685
1120	Examination of the Site of the Stomach, Liver, and Spleen	551	685

2014		1543	1555
1120	How the Liver, Stomach, and Spleen Can Be Pulled Downward as if Drawn into the Thoracic Cavity	551	686
1121	How the Omentum Should Be Pulled Apart and Its Origin Investigated, Together with the Vessels Supported by It	551	686
1121	How Organs Placed in the Concave Area of the Liver Should Be Viewed	552	686
1122	How to Examine Branches of the Portal Vein and the Arteries and Nerves Running beside Them	552	687
1123	How to Study the Nature of the Mesentery	552	687
1123	How the Intestines Should Be Resected from the Mesentery and Removed from the Body	553	688
1124	How the Intestinal Tunics Should Be Examined	553	688
1124	How to Remove the Stomach, Spleen, Omentum, and Mesentery Together, and What Should Be Observed in Such an Operation	553	689
1125	How to Observe the Tunic of the Spleen, Together with Its Attachment to the Stomach and Its Substance	554	689
1125	Examination of the Stomach's Capacity and Its Tunics	554	690
1125	How to Observe the Seminal Arteries	554	690
1126	How to Observe the Distribution of the Vena Cava and Great Artery in the Cavity of the Peritoneum	554	690
1126	Examination of the Renal Tunics and the Nature of the Kidneys as a Whole	554	690
1127	Examination of the Origin of Vessels to the Left Testicle	555	691
1127	Removal of the Wrappings from the Testicles and Penis	555	691
1127	Examination of the Site of the Testicles	555	692
1128	Opening the Outer Tunic of the Testicle and Uncovering the Seminal Vessels	555	692
1128	Examining the Seminal Vessels around the Testicle and the Testicle Itself	555	692
1129	Examination of the Penis Muscles	556	693
1129	Examination of the Origin of the Bodies of the Penis and the Veins, Arteries, and Nerves Going There	556	693
1129	How to Separate the Pubic Bones	556	693
1129	Examination of the Urinary Passages to the Bladder and the Vessels Delivering Semen to the Glandular Body of the Bladder	556	693
1129	Examination of the Distribution of the Vena Cava and the Great Artery under the Sacrum	556	693
1130	Examination of the Muscle at the Neck of the Bladder, and of the Base and Neck of the Bladder Itself	556	693

2014		1543	1555
1130	Bodies of the Penis	556	694
1130	Muscles of the Rectum	556	694
1131	Origin of the Peritoneum	557	694
1131	What Dissection of the Parts Described Should Be like in a Woman; Examination of the Breasts	557	694
1131	How to Observe the Site of the Uterus and Bladder	557	695
1131	Examination of the Seminal Vessels	557	695
1132	Veins to the Bottom of the Fundus of the Uterus and the Vagina	557	695
1132	Urinary Channels	557	695
1132	Examination of the Fetus and Its Wrappings	557	695
1133	Examination of the Umbilical Vessels	558	696
1133	Examination of Acetabula	558	697
1134	APPENDIX A: Revised Beginning of Chapter 19	–	680
1134	At What Places in This Work the Method of Dissecting the Parts Is Explained	–	680
1134	What Order Should Be Observed in Teaching and Demonstrating Anatomy	–	681
1135	What Sort of Things Are Similar and Instrumentary Parts	–	681
1135	The Order of Dissection Must Be Varied according to the Availability of Cadavers	–	682
1136	APPENDIX B: Revised End of the Section on the Examination of the Fetus and Its Wrapping	–	696
1137	APPENDIX C: Revised Version of the Section on the Examination of the Acetabula	–	697
