

BOOK 7

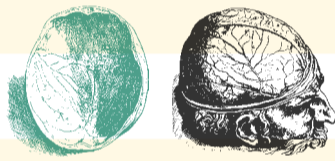

Dedicated to the Brain, Seat of the Animal Faculty, and to the Organs of the Senses, Showing at the Beginning Virtually All Its Figures as in the Preceding Two Books

2014

CHAPTER 1

1256	THE BRAIN IS CONSTRUCTED FOR THE SAKE OF THE PRIMARY SPIRIT, AND FOR SENSATION AND VOLUNTARY MOVEMENT	622	772
1256	Subject of the Fifth and Sixth Books	622	772
1256	Argument of the Seventh Book	622	772
1256	Brief Enumeration of the Functions and Parts of the Brain	622	772
1258	The Opinion of Thomas, Scotus, Albertus, and Writers of That Cohort about the Ventricles of the Brain	623	–
1259	The Construction of the Brain of Animals Does Not Differ from That of Man	624	–
1260	APPENDIX: Revised Ending to Chapter 1	–	773
1260	The Construction of the Brain of Animals Does Not Differ from That of Man	–	773
1260	The Opinion of Thomas, Scotus, Albertus, and Writers of That Cohort about the Ventricles of the Brain	–	774

CHAPTER 2

1261	ON THE HARD MEMBRANE SURROUNDING THE BRAIN, AND THE SMALL SUBCUTANEOUS MEMBRANE ENCLOSING THE SKULL	624	774
1261	Location of the Hard Membrane; Its Number, Size, and Shape	624	775
1263	Connection of the Hard Membrane to the Skull	625	775
1263	Processes of the Hard Membrane	625	–
1264	Nature of the Inner Surface of the Hard Membrane	626	776
1264	Connection of the Hard Membrane to the Thin	626	776
1265	Vessels of the Hard Membrane of the Brain	626	776
1265	Foramina	626	–
1265	Function of the Hard Membrane; Its Mode of Construction	626	777
1266	Creation and Use of the Membrane Covering the Skull on the Outside	627	777
1267	APPENDIX: Revised Version of the Section on Foramina of the Hard Membrane	–	777

2014

1543

1555

CHAPTER 3

1268	ON THE THIN MEMBRANE ENVELOPING THE BRAIN	627	778
1268	Number of This Membrane	627	778
1268	Location	627	778
1269	Outer Surface	628	778
1269	Method of Construction and Function	628	778
1270	APPENDIX: Revised Ending of Chapter 3	–	778
1270	Why the Thin Membrane Is Also Called χοροειδής	–	778

CHAPTER 4

1271	ON THE NUMBER, PLACE, SHAPE, CONVOLUTIONS, AND SUBSTANCE OF THE CEREBRUM AND CEREBELLUM	628	779
1271	Number of the Cerebrum	628	779
1272	In What Places the Right Part of the Brain Is Continuous with the Left	629	779
1272	How the Cerebellum Is Continuous with the Cerebrum	629	779
1272	Location and Size of the Cerebellum	629	780
1273	Shape of the Cerebellum	629	780
1273	Size and Shape of the Cerebrum	629	–
1274	The Division Separating What We Call the Right Part of the Cerebrum from the Left, and the Convolution of the Brain	630	781
1274	Function of Cerebral Convolution	630	781
1275	Reason for Dividing the Cerebrum	630	782
1275	Reason for the Folds of the Cerebellum, and Their Type	631	782
1275	Galen Assigned an Inappropriate Reason for the Unity of the Cerebellum	631	782
1276	Beginning of the Dorsal Medulla	631	782
1276	Hardness of the Cerebrum and Cerebellum, and the Origin of Nerves	631	782
1276	Color and Substance of the Cerebrum, Cerebellum, and Spinal Medulla	631	783
1276	Difference between the Substance of the Brain and the Marrow of the Bones	631	783
1277	How the Nutrition of the Cerebral Substance Has Been Provided For	632	783
1278	APPENDIX: Revised Version of the Section on the Size and Shape of the Cerebrum	–	780
1278	Cerebrum and Cerebellum Do Not Require Their Own Shape	–	781

2014

1543 1555

CHAPTER 5

1279	ON THE CORPUS CALLOSUM OF THE CEREBRUM, AND THE SEPTUM OF THE RIGHT AND LEFT VENTRICLES OF THE CEREBRUM	632	784
1279	Location and Nomenclature of the Corpus Callosum	632	784
1280	Beginning of the Corpus Callosum, or Its Continuity with the Other Substance of the Cerebrum	632	784
1280	Depressions Seen at the Sides of the Corpus Callosum	632	784
1280	A Description of the Septum between the Right and Left Ventricles	633	785
1281	Function of the Corpus Callosum and the Septum	633	785

CHAPTER 6

1282	ON THE CEREBRAL VENTRICLES	633	785
1282	Number of Ventricles	633	785
1282	Description of the Right and Left Ventricles	633	785
1283	A Large Number of Galen's Wrong Opinions Are Not Described Here	634	786
1284	Description of the Common Cavity of the Right and Left Ventricles or Third Ventricle	634	786
1284	Passages Coming from the Third Ventricle	634	787
1285	Description of the Fourth Ventricle	635	787
1286	What Is in Each of the Ventricles	635	788
1286	The First Three Cerebral Ventricles Are Not Surrounded by the Thin Membrane	635	788
1287	Function of the Ventricles	636	788

CHAPTER 7

1288	ON THE CEREBRAL BODY COMPARED BY ANATOMISTS TO A TORTOISE SHELL OR CHAMBER	636	789
1288	Location of the Body Formed like a Tortoise Shell	636	789
1288	Substance	636	789
1289	Attachment; Lower Surface	637	789
1289	Upper Surface	637	790
1289	Function of the Vaulted Body	637	790

2014

1543 1555

CHAPTER 8

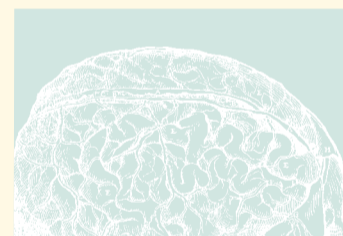

1290	ON THE CEREBRAL GLAND RESEMBLING A PINE NUT	637	790
1290	Site of the Gland like a Pine Nut	637	790
1290	Function of This Gland	638	790

CHAPTER 9

1291	ON THE TESTES AND BUTTOCKS OF THE CEREBRUM	638	791
1291	Number of the Testes and Buttocks of the Cerebrum	638	791
1291	Location	638	791
1291	Substance	638	791
1291	Shape	638	791

CHAPTER 10

1292	ON THE PROCESSES OF THE CEREBELLUM RESEMBLING A WORM AND THE TENDONS THAT HOLD THEM	638	792
1292	What the Vermiform Processes Are Like	639	792
1292	Vermiform Process Described by Galen in Book 8 of <i>De usu partium</i>	639	792
1293	Tendons by Which the Vermiform Processes Are Contained	639	793

2014

1543

1555

CHAPTER 11

1294	ON THE INFUNDIBULUM, THE GLANDULE RECEIVING THE CEREBRAL PHLEGM, AND THE OTHER DUCTS THAT PURGE IT	640	793
1294	Brief Enumeration of the Parts Serving the Drainage of Phlegm	640	793
1294	Passages Coming from the Third Cerebral Ventricle	640	793
1295	Basin into Which the Cerebral Phlegm Drains	640	794
1295	Description of the Gland Receiving Phlegm	640	794
1296	Channels Coming out of the Gland	641	794
1296	Function and Construction of the Parts That We Have Stated Serve the Purgation of Phlegm	641	795
1298	APPENDIX: Revised Version of the Passage on the Straining of Phlegm through the Sphenoid Bone	-	795
1298	Phlegm Is Not Strained Slowly through the Cuneiform Bone or through Tiny Holes	-	795
1298	Phlegm Is Not Purged in Any Natural Excretion through the Seat of the Olfactory Organs or the Eighth Bone of the Head	-	795

CHAPTER 12

1299	ON THE NETWORKS OF THE CEREBRUM, ONE OF WHICH IS THOUGHT TO BE LIKE THE RETICULAR PLEXUS AND THE OTHER SIMILAR TO THE NETWORK FORMED OF THE PLACENTA	642	796
1299	No Reticular Plexus Exists beneath the Brain, as Galen Describes It	642	796
1301	APPENDIX: Revised Ending of Chapter 12	-	797
1301	The Plexus Occurring in the Anterior Cerebral Ventricles	-	797

CHAPTER 13

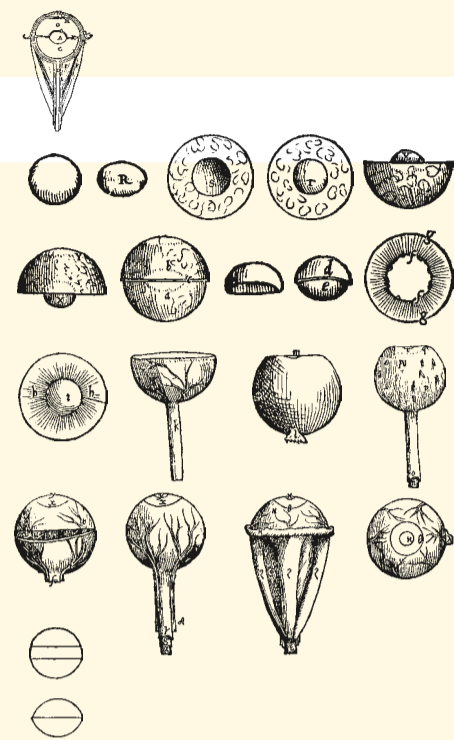

1302	ON THE ORGAN OF SMELL	643	798
------	------------------------------	-----	-----

2014

1543

1555

CHAPTER 14

1303	ON THE EYE, THE INSTRUMENT OF VISION	643	798
1303	First Figure of the Fourteenth Chapter	643	798
1304	Index of the Eighteen Figures That Follow the First Here in a Series and of Their Characters	644	799
1306	Location of the Eyes	646	801
1306	How the Construction of the Eye Will Be Told	646	801
1306	Crystalline Humor	646	801
1306	Thin, Transparent Tunic like an Onion Skin Attached to the Front of the Crystalline Humor	646	801
1307	Vitreous Humor	646	801
1307	Wrapping of the Eye Independent of the Substance of the Visory Nerve and Comparable to a Net	647	802
1308	Tunic Prepared from the Thin Cerebral Membrane, Called the Uvea	647	803
1309	Pupil	648	803
1309	Colors of the Uveal Tunic	648	804
1309	Eye Color Is Unaffected by the Quantity of Humors or Spirits	648	804
1309	Tunic Comparable to the Hairs and Lashes of the Eyelids	648	804
1310	Hard Tunic of the Eye Coming from the Hard Cerebral Membrane	648	804
1310	Aqueous Humor	649	805
1311	Adherent or White Tunic of the Eye	649	805
1311	Function of the Parts of the Eye	649	806

CHAPTER 15

1312	ON THE INSTRUMENT OF HEARING	650	806
------	-------------------------------------	-----	-----

2014

1543

1555

CHAPTER 16

1313 ON THE INSTRUMENT OF TASTE 650 806

CHAPTER 17

1314 ON THE INSTRUMENT OF TOUCH 650 807

CHAPTER 18

1315 METHOD OF DISSECTING THE BRAIN AND ALL THE ORGANS THAT ARE DESCRIBED IN THE PRESENT BOOK 650 807

1315 How the Head Should Be Prepared for Inspection of the Brain 650 807

1315 How the Skull Should Be Opened for an Anatomy of the Brain 651 807

1316 Examination of the Skin, Fat, Fleishy Membrane, Wrapping of the Skull, and the Membrane beneath the Skull 651 808

1316 How the Space of the Hard Membrane Should Be Examined 651 808

1316 Uncovering of the Thin Membrane 651 808

1317 Removal of the Thin Membrane from the Convolutions of the Cerebrum 652 809

1317 Examination of the Upper Surface of the Corpus Callosum 652 809

1318 Opening of the Right and Left Ventricles 652 809

1318 Examination of the Septum between the Right and Left Ventricles 652 809

1318 Examination of the Body Formed like a Tortoise Shell 652 809

1318 Examination of the Right and Left Ventricles and the Vessels in Them 652 810

1319 Glandule Resting on the Testes 653 810

1319 The Third Ventricle and Its Passages 653 810

1319 Sinuses of the Hard Membrane 653 810

1320 Uncovering the Cerebellum 653 810

1320 Examination of the Testes and Buttocks 653 811

1320 Meeting of the Spinal Medulla with the Cerebellum 653 811

1320 Examination of the Fourth Ventricle 653 811

1321 Vermiform Processes 653 811

1321 Examination of the Nerve Pairs 654 811

1322 Examination of the Things in the Base of the Hard Membrane 654 812

2014

1543

1555

1322 Gland Receiving Phlegm, and the Arteries Resting Thereon 654 812

1322 Dissection of the Eye 654 813

1324 Another Way of Dissecting the Eye 656 814

1324 Examination of the Organ of Hearing 656 814

1325 Examination of Muscles Not Dissected in the Body Thus Far Described 656 815

1325 Examination of the Series of Veins, Arteries, and Nerves throughout the Arm 656 815

1327 Examination of the Veins, Arteries, and Nerves of the Leg 657 817

CHAPTER 19

1330 SOME REMARKS ON VIVISECTION 658 818

1330 What Is Learned from Dissection of the Dead, and What from Vivisection 658 818

1330 How the Use of Bones and Cartilages Should Be Seen in a Living Animal 658 818

1330 Use of the Ligaments 658 818

1330 How the Use and Function of Muscles Are Seen 658 818

1330 Function of the Nerve in Muscles 658 818

1331 Examining the Function of Nerves 659 819

1331 The Spinal Medulla 659 819

1332 Veins 659 819

1332 Arteries 659 819

1332 Examining the Functions of What Is in the Peritoneum 660 820

1333 Organs of Generation 660 820

1333 Fetuses 660 820

1333 Examination of the Function of the Heart and the Parts Serving It 660 821

1334 Examination of Brain Function 661 822

1335 A Vivisection with Which a Finishing Touch Is Put on Anatomical Observation at Padua and Bologna 661 822

1335 Examination of the Recurrent Nerves and Elimination of the Voice by Cutting Them 658 [662] 823

1336 Examining the Function of the Transverse Septum 658 [662] 823

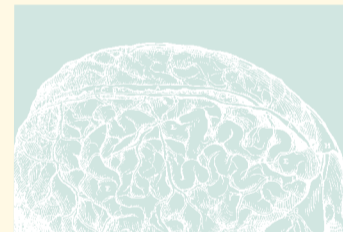

1336 Motions of the Lung 658 [662] 823

1336 Examination of Water Located in the Wrapping of the Heart, and Motions of the Heart 658 [662] 823

1337 Examining whether the Pulse of the Heart and the Arteries Is the Same 658 [662] 824

1337 Examination of Fetuses 659 [663] 824

1337 Examining the Motions of the Venous Artery and the Arterial Vein 659 [663] 824

i **TYPOGRAPHICAL APPENDIX** - -
by Christian Mengelt
