

## The Publication of the Vesalius Year 2014

The atlas of anatomy *De humani corporis fabrica* by Andreas Vesalius (1514–1564) appears in English and is now accessible to everyone. Karger Publishers is proud to present:

### ***The Fabric of the Human Body***

Basel, September 26, 2013 – For over 20 years, the translators Malcolm Hast and Daniel Garrison in Chicago have invested their time critically and precisely translating both editions and the hand-written annotations of Vesalius' anatomy atlas from its original Latin text into English! The woodblock prints of the famous 'musclemen' and many other detailed illustrations have been digitalized and are presented in an exactness never seen before.

In October 2013, Karger will be launching the 14-kg, 1,400-page and DIN A3-sized 'New Fabrica' at presentations in Basel, Frankfurt and London. We are pleased to be able to invite you to attend one of our launches.

**Basel:** Monday October 7, 2013, Pharmacy Museum Basel, Totengässlein 2, 17.30 h. Both translators will be present.

**Frankfurt Book Fair:** Thursday October 10, 2013, Forum STM & Specialist Information (Stand 4.2 B2), 17.00–17.30 h, lecture by Prof. Daniel Garrison (translator). On view at the Karger stand (r.2 K33) for the duration of the Book Fair.

**London:** Monday October 14, 2013, The Heritage Centre, The Royal Society of Medicine, 1 Wimpole Street, London W1G 0AE. Presentation and cocktail reception 16.30–20.00 h. Both translators will be present.

### **Karger Publishers**

Karger Publishers of Basel, Switzerland, is a leading international biomedical publisher. Currently, production comprises 90 journals and approx. 50 book titles per year, both research and clinical, the majority of which are in English. Karger has spent the past century since 1890 as a publisher working to connect people who want to share their knowledge with those who want to learn, embracing a corporate philosophy summarized by the phrase 'Connecting the World of Biomedical Science'. The company intends to hold to this philosophy, keeping pace with new technologies and developing practical solutions as an expression of its strong commitment to meeting the information needs of the scientific community.
